

Procedure Description

Permanent Cosmetics is the revolutionary method of applying permanent cosmetic pigments into the dermal layer of the skin with a state of the art digital machine.

An extremely effective topical anesthetic is used for comfort. Most clients experience only the slightest scratching sensation.

This technique is medically proven and specifically designed to be completely safe. Permanent Cosmetics has been used and endorsed for years by Plastic and Cosmetic Surgeons, Ophthalmologists and Dermatologists and permanent makeup is embraced as a non-surgical "cures."

Permanent Cosmetics is used for a variety of permanent cosmetic enhancements, such as permanent eyebrows, eyeliner, full lip color and beauty marks.

JUST IMAGINE!!!

***No longer will you need to
carry makeup in your purse!!!***

Who Benefits From Permanent Cosmetics?

- *Men as well as women.
- *Anyone who desires freedom and convenience from daily makeup application.
- *Busy People with little time to apply makeup.
- *People with allergies to conventional makeup.
- *Those who are physically incapable of applying makeup (unsteady hands, visual impairments).
- *Athletic people and those with oily skin who tend to shed makeup easily.
- *Those who seek correction of asymmetrical facial features.
- *Those who wish to look their best at all times.
- *Those with thin, light, sparse or non-existence eyebrows.
- *Those who would prefer lash enhancement and eyeliner for faded or sparse lashes.
- *Those who have lost their natural pigmentation.
- *Those who experience contact lens sensitivities.
- *Those who have had chemotherapy and experience absence of hair.

Do I have a choice of Colors? Most Definitely. There is a wide spectrum of colors that you may choose from.

Do I have a choice in the placement of pigments? Of course. You will be fully aware during the procedure, instructing the technician where you wish the pigment to be located.

What is involved in recovery? There will be slight swelling and redness in the skin; which will quickly subside. You may resume normal activities immediately after the procedure. Your "perfecting session" will be scheduled in 5-6 weeks after initial procedure.

Services & Prices

- *Beauty Marks**
- *Eyeliner**
